

AMAN NADEEM

Software Engineer | AI/ML | QA and AI Output Evaluation

Lahore, Pakistan | +92 333 451 5438 | amannadeemcentral766@gmail.com | <http://www.linkedin.com/in/amannadeem11>

PROFESSIONAL SUMMARY

Software Engineer who works hands-on with AI-generated content and data, from building LLM-powered tools to reviewing and fact-checking AI-assisted writing for accuracy and clarity. Trained in software testing and experienced in data cleaning, with a careful, detail-focused approach to following instructions and keeping records accurate. Comfortable working independently and remotely, and adapting when guidelines change. Seeking AI data annotation and evaluation work where careful judgment improves model quality.

SKILLS

Generative AI and AI Evaluation: Reviewing and Fact-Checking AI-Generated Responses, Prompt Engineering, LLM Integration, Google Gemini API, Groq API, AI Chatbot Development, AI Agents

QA and Testing: Manual and Automated Testing, Functional Testing, Regression Testing, Exploratory Testing, User Acceptance Testing, API Testing, Postman, JIRA, Test Plan Design, Defect Life Cycle, Agile Testing

Data and Analysis: Data Cleaning, Data Analysis, Data Visualization, Statistics, Pandas, NumPy, Excel, PowerPoint

Machine Learning: Supervised and Unsupervised Learning, Scikit-learn, Model Training and Evaluation, Feature Engineering, Classification, Regression, Neural Networks, NLP

Programming and Web Development: Python, SQL, C++, JavaScript, Flask, REST APIs, MERN Stack (MongoDB, Express, React, Node.js)

Tools and Practices: Git, GitHub, Agile, Scrum, SDLC, Vercel, Railway, CI/CD, n8n

Soft Skills: Attention to Detail, Following Detailed Guidelines, Independent Remote Work, Clear Written Communication, Adaptability, Time Management, Team Leadership

EDUCATION

BS Software Engineering | Lahore College for Women University | 2022-2026

- CGPA: 3.42 / 4.00 | Coursework: Statistics, Database Systems, Artificial Intelligence, Software Requirements Engineering, SQA, Data Science.

Intermediate, FSc Pre-Engineering | Punjab Group of Colleges, Lahore | 2020-2022

- Score 1024 / 1100 (93%); Merit Scholarship recipient.

EXPERIENCE

Content Writer | Freelance | Apr 2026-Present

- Wrote 15 to 30 SEO-friendly technology blog articles (2,000 to 3,000 words each), researching each topic independently and meeting client SEO requirements.
- Used ChatGPT, Claude, Gemini, and Perplexity for research and outlining, then fact-checked and edited their output by hand to correct errors and unclear wording, delivering 100% on time.

IT Coordinator | Concordia Colleges, Raiwind, Lahore | Jan 2026-Jul 2026

- Managed digital records for 400+ students and 50+ campus systems, keeping data accurate and daily academic operations running with minimal disruption.
- Resolved technical issues for staff and students and kept structured documentation to reduce recurring problems.

Software Engineering Intern | Karim Industries, Lahore | Nov 2025-Dec 2025

- Prepared and formatted documentation, operational records, and reports in MS Word and Excel, improving clarity and consistency across departments.
- Did precise, detail-focused writing and data entry daily over 6 weeks.

Computer Science Instructor | Al Chemist Science Academy, Lahore | May 2025-Sep 2025

- Taught three concurrent cohorts (Matric, ICS, and O Level), each with its own syllabus and deadlines, adapting lessons to Cambridge curriculum standards.

PROJECTS

AI-Powered Financial Statement Analyzer | Python, Pandas, Google Gemini API

- Cleaned and structured CSV and Excel bank statement data with Pandas, then used the Gemini API to generate AI-powered financial analysis.
- Built an AI chat feature that answers user questions using the transaction data as context.
- Capped input at 100 transaction rows per request to manage LLM context limits, balancing analysis depth with token cost.

Customer Churn Prediction and Retention Analytics System | Python, SQL, Scikit-learn, Flask

- Analyzed 7,043 customer records and benchmarked 5 classification models to identify churn risk and its key drivers.
- Deployed the best model, Random Forest (83% accuracy), as a REST API for live predictions, using feature engineering and cross-validation.

CareSync: Family Care Coordination Platform | React, Node.js, MongoDB, Groq AI

- Led a three-person team to build a dashboard for fair task distribution, health tracking, and automated reminders, deployed on Vercel.
- Integrated a Groq AI chatbot for real-time guidance, a predictive module that flags concerning health metric changes, and a rule-based Burden Score system; set up email notifications via Railway.

CERTIFICATIONS

- Introduction to Software Testing, University of Minnesota via Coursera, 2025
- AI for Content Creation, Google via Coursera, 2026
- Google Data Analytics Certificate, Google via Coursera, In Progress
- 5-Day AI Agents Intensive, Google Developers, 2026
- Foundations of Project Management, Google via Coursera, 2025
- Accenture Software Engineering Job Simulation, Forage, 2025
- AWS Solutions Architecture Job Simulation, Forage, 2025
- Investment Risk Management, Coursera Project, 2026
