

PORTFOLIO PROJECT · INDEPENDENT CONCEPT

Meta Ads Campaign Plan

Winter wedding and festive season campaign for Khaadi, a Pakistani fashion brand. A 30 day plan covering goals, audiences, campaign structure, ad copy, testing and reporting.

Prepared by Aman Nadeem

This plan was written independently as a portfolio project. It is not affiliated with, commissioned by or endorsed by Khaadi, and I have no access to the brand's ad account or sales data. All business figures and planning targets are assumptions made for demonstration, not results from a real campaign.

1. Business and goal

Khaadi is a well known Pakistani fashion brand that sells through stores and an online shop. The campaign focuses on online sales during the winter wedding season, when many customers are already looking for what to wear.

Business snapshot	Assumption
Average order value	PKR 7,500
Gross margin on products	50%
Main market	Pakistan (major cities first)
Platforms	Facebook and Instagram (Meta Ads)
Payment mix	Cash on delivery and online payment

Campaign goal

Win about 60 online purchases in 30 days at a return on ad spend (ROAS) of at least 3.0.

PKR 150K budget (PKR 5,000 a day for 30 days)	2.0 break even ROAS	3.0 target ROAS	PKR 2,500 target cost per purchase
--	-------------------------------	---------------------------	--

How the numbers work

Step	Calculation	Result
Break even ROAS	1 divided by the 50% margin	2.0
Revenue at target	PKR 150,000 x 3.0	PKR 450,000
Orders needed	PKR 450,000 divided by PKR 7,500	60
Target cost per purchase	PKR 150,000 divided by 60	PKR 2,500
Gross profit before ad spend	PKR 450,000 x 50%	PKR 225,000
Profit after ad spend (before delivery and return costs)	PKR 225,000 minus PKR 150,000	PKR 75,000

Why this matters: any ROAS below 2.0 loses money, so the plan treats 2.0 as the floor and 3.0 as the goal. The target leaves room for cancelled and returned orders, which are common in online fashion and reduce the real margin.

2. Campaign structure

One campaign with two ad sets. A modest budget works better when it is concentrated, because spreading it across many ad sets slows Meta's learning.

Level	Setup
Campaign	Objective: Sales (purchases on the website). Name: WINTER_WEDDING_SALES
Ad set 1 Prospecting	Audience: Pakistan, women aged 20 to 45, starting with Lahore, Karachi, Islamabad and Rawalpindi. Interests in fashion, wedding planning and formal wear. Placements: Advantage+ (automatic). Budget: PKR 3,000 a day.
Ad set 2 Retargeting	Audience: website visitors (30 days), add to cart (14 days) and people who engaged on Instagram or Facebook (60 days). Budget: PKR 1,250 a day.
Reserve	PKR 750 a day held back and added to the best performing ad after week 2.

Daily budget split

Part	Per day	30 days	Share
Prospecting	PKR 3,000	PKR 90,000	60%
Retargeting	PKR 1,250	PKR 37,500	25%
Reserve for the winner	PKR 750	PKR 22,500	15%
Total	PKR 5,000	PKR 150,000	100%

Tracking setup (before launch)

- Meta Pixel installed, with events ViewContent, AddToCart, InitiateCheckout and Purchase tested.
- Conversions API connected alongside the Pixel, so purchases are still counted when browsers block tracking.
- Domain verified in Business Manager and the Purchase event set as the optimization goal.
- UTM naming: utm_source=facebook, utm_medium=paid_social, utm_campaign=winter_wedding, utm_content=concept_a (or b, c).
- Cash on delivery check: the Purchase event fires when an order is placed, so orders later cancelled or refused at the door still count. Compare Meta's numbers with the confirmed delivery rate every week.

3. Creative and ad copy

Three concepts are tested against each other. Each concept runs as a 9:16 short video for Stories and Reels and a 4:5 image for the feed. A Roman Urdu line is tested with each concept, since many shoppers respond to the language they use every day.

CONCEPT A · THE WEDDING GUEST LOOK

Primary text: Three weddings this winter and nothing to wear? Find an outfit ready for the dholki, the mehndi and the barat. Roman Urdu test: Is shaadi season mein kya pehnna hai? Yahan se chuniye.

Headline: Dress for every function

Button: Shop now

CONCEPT B · WARM AND ELEGANT

Primary text: Cold evenings do not mean hiding your outfit. Explore winter pieces that keep you warm and still look festive. Roman Urdu test: Sardi bhi, style bhi.

Headline: Winter looks, made to be seen

Button: Shop now

CONCEPT C · SOCIAL PROOF

Primary text: [Use a real customer review here. Do not launch this concept with an invented quote.]

Headline: Loved by our customers

Button: Shop now

RETARGETING AD

Primary text: Still thinking about it? Your pick is waiting in your cart. [Add a delivery or discount line only if the brand is actually running that offer.]

Headline: Come back and finish your order

Button: Shop now

Local notes

- Show products on real models in natural light. Phone shot video often feels more trustworthy than heavily edited ads.
- Make the cash on delivery option clear on the landing page, since it reduces hesitation for first time buyers.
- Check that the website loads quickly on mobile data, because most traffic will come from phones.

4. Testing plan and KPIs

Week	Action
Week 1	Run concepts A, B and C with equal budget. Do not change anything for the first 3 days.
Week 2	Pause the weakest concept. Start adding the reserve budget to the best ad.
Weeks 3 and 4	Scale the winner, refresh the creative if results slow down, and keep retargeting active. Plan the final week around month end, when many people receive their salary.

KPIs and planning targets

Targets are starting assumptions and should be adjusted after the first 7 days of real data.

Metric	What it tells us	Target
Link click through rate	Is the ad interesting?	1.0% or higher
Cost per link click	Cost of attention	PKR 30 or lower
Add to cart rate	Is the landing page convincing?	Track weekly
Cost per purchase	Efficiency	PKR 2,500 or lower
Confirmed order rate	How many orders are really delivered?	Track weekly
ROAS	Profitability	3.0 or higher

Decision rule: review any ad that spends twice the target cost per purchase (PKR 5,000) with no sale. Change one thing at a time, so the result is clear.

5. Reporting and next steps

Weekly report (one page)

Section	Contents
Results	Spend, purchases, cost per purchase, ROAS and revenue
Best and worst ads	Top ad, weakest ad and the reason for each
Audience insight	Which city, age group and placement performed best
Decisions	What changes next week and why

What I would need from the client

- Access to Meta Business Manager and the ad account
- Product photos, short videos and brand guidelines
- Real customer reviews for concept C
- Confirmation of any offer, delivery charges and cash on delivery terms
- Confirmed delivery and return rates, so ROAS can be judged on real orders

Deliverables

- Campaign setup and tracking check
- Ad creative briefs and copy
- Weekly one page report
- Final summary with recommendations
