EDUCATION

- BS Software Engineering** | Lahore College for Women University 2022 to 2026
- CGPA 3.42 / 4.00. Coursework: Technical and Business Writing, Digital Marketing, Web Engineering, Artificial Intelligence, Software Requirements Engineering, IT Law.
- Intermediate, FSc Pre Engineering** | Punjab Group of Colleges, Lahore 2020 to 2022
- Scored 1024 / 1100 (93%) and received a full Merit Scholarship covering the two-year program.

EXPERIENCE

- Content Writer** | Freelance Present
- Wrote and published an independent research article explaining new SBA lending rules; its clarity and depth were cited by a hiring team as a reason for advancing to interview.
 - Researched and wrote 15 to 30 SEO friendly blog articles (2,000 to 3,000 words each) for a technology focused client, covering each topic independently for accuracy and depth.
 - Used ChatGPT, Claude, Gemini, and Perplexity to speed up research, outlining, and self editing, while maintaining 100% on time delivery across all assignments.
- IT Coordinator** | Concordia Colleges, Raiwind, Lahore Jan 2026 to Jul 2026
- Managed IT systems and digital records across campus, overseeing 50+ systems and 400+ student records with consistent uptime.
 - Wrote clear, structured documentation for recurring technical issues, translating technical problems into plain language and reducing repeat support requests.
- Software Engineering Intern** | Karim Industries, Lahore Nov 2025 to Dec 2025
- Prepared and formatted written documentation, operational records, and reports using MS Word and Excel, improving clarity and consistency across departments.
 - Practiced precise, detail focused writing and data entry across 6 weeks of daily documentation and record keeping tasks.
- Computer Science Instructor** | Al Chemist Science Academy, Lahore May 2025 to Sep 2025
- Simplified technical programming concepts into clear, structured lessons for three concurrent student cohorts, managing distinct syllabi and deadlines.
 - Adapted explanations and materials for different learning levels, strengthening the ability to write for varied audiences.

PROJECTS

- Customer Churn Prediction System: Researched and documented findings from 7,043 customer records across 5 classification models, explaining outcomes in plain language in a final written report.
- AI Powered Financial Statement Analyzer: Designed the tool's output structure and wrote accompanying documentation so raw financial data is explained in plain language for non technical users.
- CareSync Family Care Platform: Led a 3-person team and wrote all user facing content and documentation; conducted user outreach and translated feedback into prioritized write ups for the team.

CERTIFICATIONS

- 5 Day AI Agents Intensive, Google Developers, 2026: Training in building and deploying AI agent workflows.
- AI for Content Creation, Google via Coursera, 2026
- Google Data Analytics Certificate, Google via Coursera, In Progress
- Foundations of Project Management, Google, 2025
- Investment Risk Management, Coursera Project, 2026 | Introduction to Software Testing, University of Minnesota, 2025
- Accenture and AWS Solutions Architecture Job Simulations, Forage, 2025
