

AMAN NADEEM

Software Engineer | AI/ML Enthusiast

Lahore, Pakistan | +92 333 451 5438 | amannadeemcentral766@gmail.com | <http://www.linkedin.com/in/amannadeem11>

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building machine learning pipelines, integrating generative AI, and data-driven applications. Skilled in Python, data analysis, and LLM-powered tools, with a track record of delivering projects from data processing through deployment. Combines strong technical depth with structured problem solving. Seeking to contribute to a team that values practical problem-solving and continuous learning.

SKILLS

Programming and Web Development: Python, SQL, C++, JavaScript, Flask, REST APIs, MERN Stack (MongoDB, Express, React, Node.js)

Machine Learning: Supervised Learning, Unsupervised Learning, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Model Training, Model Evaluation, Feature Engineering, Classification, Regression, Deep Learning, Neural Networks, NLP

Generative AI: Prompt Engineering, LLM Integration, Google Gemini API, Groq API, AI Chatbot Development

Automation: n8n, AI Agents, Python Scripting for Automation

Tools and Practices: Git, GitHub, Agile, Scrum, Sprint Planning, SDLC, Vercel, Railway, CI/CD

Data and Analysis: Data Cleaning, Data Analysis, Data Visualization, Statistics, Excel, PowerPoint

QA and Testing: Manual and Automated Testing, Functional Testing, Regression Testing, Performance Testing, Security Testing, User Acceptance Testing, Exploratory Testing, API Testing, Postman, JIRA, Test Plan Design, Defect Life Cycle, Agile Testing

Soft Skills: Team Leadership, Cross-functional Collaboration, Analytical Problem Solving, Clear Communication, Adaptability, Time Management

EDUCATION

BS Software Engineering | Lahore College for Women University | 2022-2026

- CGPA: 3.42 / 4.00 | Coursework: Statistics, Database Systems, Artificial Intelligence, Software Requirements Engineering, SQA, Data Science.

Intermediate, FSc Pre-Engineering | Punjab Group of Colleges, Lahore | 2020-2022

- Score 1024 / 1100 (93%); Merit Scholarship recipient.

EXPERIENCE

Content Writer | Freelance | Apr 2026-Present

- Researched and wrote 15 to 30 SEO friendly blog articles (2,000 to 3,000 words each) for a technology focused client, covering each topic independently for accuracy and depth.
- Used ChatGPT, Claude, Gemini, and Perplexity to speed up research, outlining, and self editing, while maintaining 100% on time delivery across all assignments.

IT Coordinator | Concordia Colleges, Raiwind, Lahore | Jan 2026-Jul 2026

- Managed IT systems and digital records across campus, overseeing 50+ systems and 400+ student records while maintaining consistent uptime and minimal disruption to daily academic operations.
- Resolved technical issues for staff and students, and maintained structured documentation to reduce recurring system problems.

Software Engineering Intern | Karim Industries, Lahore | Nov 2025-Dec 2025

- Prepared and formatted written documentation, operational records, and reports using MS Word and Excel, improving clarity and consistency across departments.
- Practiced precise, detail focused writing and data entry across 6 weeks of daily documentation and record keeping tasks.

Computer Science Instructor | AI Chemist Science Academy, Lahore | May 2025-Sep 2025

- Delivered structured lessons across three concurrent cohorts spanning Matric, ICS, and O Level students, managing distinct syllabus and deadlines.
- Adapted teaching approaches for O Level students to meet Cambridge curriculum standards, building strong cross-level communication skills.

PROJECTS

AI-Powered Financial Statement Analyzer | Python, Pandas, Google Gemini API

- Built a tool that ingests CSV and Excel bank statements and uses Pandas to clean and structure transaction data.
- Converted transaction data into structured text and fed it to the Google Gemini API to generate AI-powered financial analysis.
- Built an AI chat feature that answers user questions using transaction data as context, powered by the Google Gemini API.
- Managed LLM context window limits by capping input to 100 transaction rows per request, balancing analysis depth with token cost.

Customer Churn Prediction and Retention Analytics System | Python, SQL, Scikit-learn, Flask

- Analyzed 7,043 customer records and benchmarked 5 classification models to identify churn risk and its key drivers.
- Deployed the best-performing model, Random Forest, with 83% accuracy as a REST API for live predictions.
- Applied feature engineering and cross-validation across all five models to improve prediction reliability for data-driven retention decisions.

CareSync: Family Care Coordination Platform | React, Node.js, MongoDB, Groq AI

- Led a three-person team to build a dashboard for fair task distribution, health tracking, and automated reminders, deployed on Vercel.
- Integrated a Groq AI-powered chatbot for real-time guidance and a predictive module that flags concerning changes in key health metrics.
- Designed a rule-based Burden Score system for fair task distribution and configured email notifications via Railway.

CERTIFICATIONS

- 5-Day AI Agents Intensive, Google Developers, 2026
- Investment Risk Management, Coursera Project, 2026
- AWS Solutions Architecture Job Simulation, Forage, 2025
- Accenture Software Engineering Job Simulation, Forage, 2025
- Introduction to Software Testing, University of Minnesota via Coursera, 2025
- Foundations of Project Management, Google via Coursera, 2025
- AI for Content Creation, Google via Coursera, 2026
